Tech Stack

> FRONT - END BATTLE 2024

- **Duration:** 24 hours
- **Submission Deadline:** May 19th, 12:00 pm
- **Result Declaration:** May 20th, 12:00 pm

Problem Statement: Participants are tasked with enhancing the existing Berkshire Hathaway website (<https://www.berkshirehathaway.com>). The goal is to improve the design and functionality while preserving the essence of the original site. The enhancements should focus on creativity, innovation, and improving user experience without compromising usability.

<https://www.berkshirehathaway.com>

Problem Statement

> FRONT - END BATTLE 2024

1. The redesign should respect the existing visual identity of Berkshire Hathaway. The site should still be recognizable as the official Berkshire Hathaway website.
2. Focus on enhancing the UX by making the site more intuitive and easier to navigate. Improvements should facilitate better interaction and engagement with the content.
3. Improve existing functionalities and introduce new features that add value to the users without overcomplicating the interface.
4. Ensure the website is fully responsive and provides a seamless experience across all devices (desktops and smartphones).

Constraints

> FRONT - END BATTLE 2024

- The developed website should be uploaded to respective GitHub, deployed via GitHub pages or Vercel ,etc. which seems fit and the thus generated link has to be shared.
- A Google Form is be given in the draft. Candidate has to fill up the form and provide the said link in it.

Submission Format

> FRONT - END BATTLE 2024

1. Creativity and Innovation: How original and innovative the proposed enhancements are.
2. User Experience Improvement: How significantly the changes do enhance the user experience?
3. Design Quality: The aesthetic appeal and visual harmony of the new design.
4. Functional Efficiency: The practicality and effectiveness of new functionalities.
5. Adherence to Constraints: How well the solution maintains the essence of the original site and meets the specified constraints.
6. Feasibility: The practicality of implementing the enhancements within a real-world scenario.
